

anion transmembrane transport

post-mating oviposition post-mating behavior

dicarboxylic acid transport

sulfate transport

Golgi vesicle transport

Wnt protein secretion

C4-dicarboxylate transport

p.adjust

size

0.7620724

drug transport

ER to Golgi vesicle-mediated transport

regulation of post-mating oviposition

inorganic anion transmembrane transport

cell morphogenesis involved in neuron differentiation cellular component morphogenesis

axonogenesis

establishment of planar polarity

cell morphogenesis

establishment of tissue polarity

regulation of cell morphogenesis

establishment of imaginal disc-derived wing hair orientation actin filament organization regulation of Notch signaling pathway regulation of axonogenesis

assembly of actomyosin apparatus involved in cytokinesis

regulation of hemocyte proliferation actin filament bundle organization hormone-mediated signaling pathway

actomyosin contractile ring assembly
