

aspartic-type peptidase activity

G-protein coupled receptor binding Rho guanyl-nucleotide exchange factor activity

hydrolase activity, acting on glycosyl bonds

transferase activity, transferring glycosyl groups

aspartic-type endopeptidase activity

hydrolase activity, hydrolyzing O-glycosyl compounds

neuropeptide hormone activity lipid-transporting ATPase activity

chitinase activity organic hydroxy compound transmembrane transporter activity

sterol transporter activity

size

20

p.adjust

0.9975853

chitin binding

phosphatidylinositol bisphosphate binding

sterol-transporting ATPase activity

cholesterol transporter activity

carbon-oxygen lyase activity

phosphatidylinositol phosphate phosphatase activity

hydro-lyase activity

amino acid:cation symporter activity

mannosyltransferase activity

RNA binding

neurotransmitter:sodium symporter activity

ATPase activity, coupled to transmembrane movement of substances solute:sodium symporter activity cysteine-type peptidase activity

peptidase activity, acting on L-amino acid peptides

sulfotransferase activity

ubiquitin-like protein-specific protease activity

peptidase activity
