

ribonucleoprotein complex biogenesis ribosome biogenesis

positive regulation of defense response

positive regulation of immune system process

cellular biosynthetic process

organic substance biosynthetic processitive regulation of innate immune response

regulation of innate immune response

p.adjust

size

0.8987207

organonitrogen compound biosynthetic process positive regulation of immune response biosynthetic process

carbohydrate derivative biosynthetic process

divalent inorganic cation transport

purine-containing compound biosynthetic process divalent metal ion transport

carbohydrate biosynthetic process

aminoglycan biosynthetic process

drug metabolic process

calcium ion transmembrane transport

sodium ion transport

calcium ion transport

polysaccharide metabolic process

cellular polysaccharide metabolic process

generation of precursor metabolites and energy

multicellular organismal homeostasis

cellular component maintenance

energy derivation by oxidation of organic compounds

retina homeostasis

postsynapse organization

tissue homeostasis
