

regulation of secretion by cell regulation of trans-synaptic signaling

modulation of chemical synaptic transmission

neurotransmitter secretion

protein folding

regulation of neurotransmitter secretion

regulation of secretion

regulation of neurotransmitter levels

signal release from synapse

response to endoplasmic reticulum stress

regulation of neurotransmitter transport

response to oxidative stress

size

nuclear chromosome segregation

neuropeptide signaling pathway

pattern specification process

cell maturation

oxidoreduction coenzyme metabolic process

regionalization

oocyte axis specification

oocyte development carbohydrate metabolic process

regulation of small molecule metabolic process

oocyte construction dorsal/ventral pattern formation

carbohydrate derivative biosynthetic process

aminoglycan biosynthetic process

cuticle development

chitin-based cuticle development
