

## response to external stimulus

regulation of axon guidance regulation of chemotaxis

positive regulation of locomotion

positive regulation of response to external stimulus

positive regulation of axonogenesis

regulation of developmenta positive regulation of growth

positive regulation of neuron projection development positive regulation of multicellular organismal process

regulation of response to external stimulus

regulation of multicellular organismal process

locomotor rhythm

positive regulation of developmental growth positive regulation of cell morphogenesis involved in differentiation

glycosaminoglycan biosynthetic processogenesis of a polarized epithelium programmed cell death involved in cell development

regulation of cell growth regulation of anatomical structure morphogenesis

positive regulation of developmental process

positive regulation of nervous system development

positive regulation of cell growth

regulation of multicellular organismal development

establishment of ommatidial planar polarity establishment of imaginal disc-derived wing hair orientation

ommatidial rotation

positive regulation of cellular process

leg disc morphogenesis
