

regulation of gene expression

nucleic acid-templated transcription

negative regulation of cellular biosynthetic process

RNA biosynthetic process

aromatic compound biosynthetic process

transcription, DNA-templated

compound eye development

regulation of transcription, DNA-templated negative regulation of macromolecule biosynthetic process

nucleobase-containing compound biosynthetic process

animal organ development

regulation of RNA metabolic process.

epithelium development

organic cyclic compound biosynthetic process

negative regulation of cellular macromolecule biosynthetic process

regulation of nucleic acid-templated transcription

regulation of biosynthetic process

nervous system development

negative regulation of gene expression

regulation of nucleobase-containing compound metabolic process

regulation of RNA biosynthetic process tissue development

RNA metabolic process

regulation of cellular macromolecule biosynthetic process anatomical structure morphogenesis

heterocycle biosynthetic process

regulation of macromolecule biosynthetic process

regulation of cellular biosynthetic process

animal organ morphogenesis
