

protein C-terminus binding

protein N-terminus binding

calcium ion binding

nucleoside-triphosphatase regulator activity

insulin-like growth factor binding

odorant binding

GTPase activator activity

GTPase regulator activity

growth factor binding

peptidoglycan muralytic activity

steroid hydroxylase activity

size

5

p.adjust

0.9188833

structural molecule activity

cation:cation antiporter activity

antiporter activity

GDP_binding

amino acid transmembrane transporter activity

sodium ion transmembrane transporter activity

active transmembrane transporter activity solute:cation antiporter activity proton transmembrane transporter activity

L-amino acid transmembrane transporter activity

chaperone binding

secondary active transmembrane transporter activity

drug transmembrane transporter activity

monovalent inorganic cation transmembrane transporter activity

inorganic cation transmembrane transporter activity

integrin binding

solute:sodium symporter activity

carbohydrate transmembrane transporter activity
