

oxoacid metabolic process organic acid metabolic process

response to starvation

small molecule metabolic process

carboxylic acid metabolic process

response to extracellular stimulus

cellular amino acid metabolic process alpha-amino acid metabolic process

determination of adult lifespan response to nutrient levels

regulation of lipid localization

multicellular organism aging aging

Notch signaling pathway

regulation of Notch signaling pathway

cell-cell junction organization

cell junction organization
positive regulation of multicellular organismal process

neuroblast division

generation of neurons

establishment or maintenance of epithelial cell apical/basal polarity

apical protein localization

apical junction assembly

spindle localization

photoreceptor cell differentiation

asymmetric neuroblast division

neuronal stem cell division

photoreceptor cell development

establishment of spindle localization

establishment of mitotic spindle localization
