0.5140984

cilium-dependent cell motility

cilium or flagellum-dependent cell motility

metal ion transport

positive regulation of vasoconstriction

regulation of blood vessel size

regulation of tube diameter catechol-containing compound metabolic process

catecholamine biosynthetic process

regulation of blood vessel diameter memory regulation of tube size

> learning vascular process in circulatory system

> > regulation of vasoconstrictionhenol-containing compound metabolic process

heterocycle catabolic process

learning or memory

blood circulation atechol-containing compound biosynthetic process fatty acid derivative biosynthetic process

circulatory system process catecholamine metabolic process

positive regulation of smooth muscle contraction

protein localization to nucleus

phasic smooth muscle contraction

import into nucleus
