

periodic partitioning segment polarity determination

cellular response to hormone stimulus transcription initiation from RNA polymerase II promoter

stem cell proliferation

DNA-templated transcription, initiation

regulation of circadian rhythm

organic substance catabolic process

proteasomal protein catabolic process

protein modification by small protein conjugation

amide transport

protein ubiquitination

protein transport intracellular protein transport

regulation of exocytosis

peptide transport vesicle mediated

vesicle-mediated transport

secretion post-Golgi vesicle-mediated transport

exocytosis

establishment of protein localization secretion by cell

intracellular transport

regulation of secretion

Golgi vesicle transport

retrograde transport, endosome to Golgi

regulation of secretion by cell-

establishment of localization in cell

cytosolic transport

vacuolar transport
