

circadian behavior circadian rhythm

rhythmic behavior

cellular potassium ion transport

metal ion transport

inorganic cation transmembrane transport

protein complex oligomerization regulation of circadian rhythm

cation transport

potassium ion transmembrane transport

potassium ion transport

ion transmembrane transport cation transmembrane transport

monovalent inorganic cation transport

inorganic ion transmembrane transport

system process

small GTPase mediated signal transduction regulation of cell communication

regulation of signaling

regulation of multicellular organismal process

system development

intracellular signal transduction

animal organ development

cyclic-nucleotide-mediated signaling structure morphogenesis

sensory organ development

animal organ morphogenesis

eye development

neuron development

second-messenger-mediated signaling

size
