

glutamate receptor signaling pathway synaptic transmission, glutamatergic

ribosome biogenesis

rRNA processing

adenylate cyclase-modulating G-protein coupled receptor signaling pathway

ribosomal small subunit biogenesis

adenylate cyclase-inhibiting G-protein coupled receptor signaling pathway

ribonucleoprotein complex biogenesis

rRNA metabolic process

protein localization to organelle

nucleic acid metabolic process

cellular aromatic compound metabolic process

protein import

cell death

p.adjust

DNA metabolic process

organic cyclic compound metabolic process

heterocycle metabolic process

nudleobase-containing compound metabolic process

regulation of programmed cell death

programmed cell death

apoptotic process

xidation-reduction process

body morphogenesis

sterol biosynthetic process

regulation of cellular macromolecule biosynthetic process

thioester metabolic process

regulation of macromolecule biosynthetic process

peptidyl-serine phosphorylation acyl-CoA metabolic process

peptidyl-serine modification
