

hormone-mediated signaling pathway

catabolic process

cellular catabolic process

neuron projection extension involved in neuron projection guidance

pigment biosynthetic process

organic acid catabolic process

carboxylic acid catabolic process

cellular amino acid catabolic process

axon extension involved in axon guidance

eye pigment biosynthetic process

alpha-amino acid metabolic process

alpha-amino acid catabolic process

cellular amino acid metabolic process

peptidyl-serine phosphorylation

p.adjust

size

0.9870573

peptidyl-serine modification

ER to Golgi vesicle-mediated transport

cell cycle phase transition

myofibril assembly

regulation of cell cycle phase transition protein folding

Golgi vesicle transport

striated muscle cell differentiation

regulation of intracellular pH

vesicle-mediated transport

negative regulation of autophagy

vesicle-mediated transport in synapse

lysosomal transport

importinto cell

heterocycle metabolic process

nucleic acid metabolic process
