

## ATP binding adenyl nucleotide binding kinase activity

ATPase activity phosphotransferase activity, alcohol group as acceptor purine ribonucleoside triphosphate binding

adenyl ribonucleotide binding

transferase activity, transferring phosphorus-containing groups

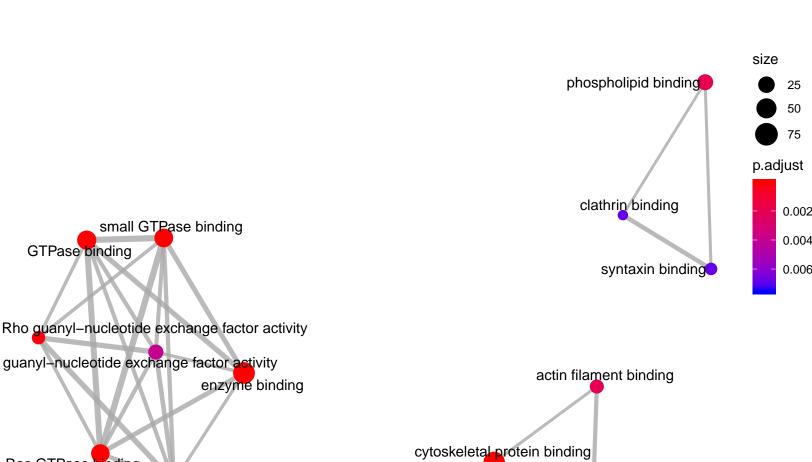

signal transducer activity, downstream of receptor

purine ribonucleotide binding

purine nucleotide binding protein kinase activity

glucuronosyltransferase activity

protein serine/threonine kinase activity

Ras GTPase binding Rho GTPase binding tubulin binding actin binding

microtubule binding

structural constituent of ribosome
