

medium-term memory

short-term memory

positive regulation of stress-activated protein kinase signalingleased netabolic process

nucleobase -containing small molecule biosynthetic process

regulation of apoptotic process

nucleobase-containing small molecule metabolic process

positive regulation of stress-activated MAPK cascade

cAMP metabolic process

aromatic compound catabolic process

nucleoside phosphate metabolic process

organic cyclic compound catabolic process

small molecule biosynthetic process

neurotransmitter metabolic process

eggshell chorion assembly

cellular protein complex disassembly

regulation of hemocyte proliferation

protein-containing complex subunit organization

dorsal appendage formation

regulation of microtubule-based process

microtubule polymerization or depolymerization cellular component disassembly

on porton disasserilisty

regulation of microtubule cytoskeleton organization protein-containing complex disassembly

hemocyte proliferation

cytoplasmic microtubule organization

supramolecular fiber organization

regulation of protein complex disassembly

asymmetric protein localization involved in cell fate determination
