

ocellus pigment biosynthetic process

compound eye retinal cell programmed cell death
homophilic cell adhesion via plasma membrane adhesion molecules
pigment metabolic process involved in developmental pigmentation

regulation of protein complex assembly

pigment biosynthetic process

eye pigment metabolic process

syncytium formation by plasma membrane fusion

ommochrome metabolic process

autophagosome maturation

regulation of vesicle fusion

eye pigmentation

ocellus pigmentation retinal cell programmed cell death

myoblast fusion

ocellus pigment metabolic process

vesicle docking involved in exocytosis

myotube differentiation

proteolysis

lysosomal transport

protein localization to vacuole

tRNA modification

protein targeting to vacuole

eye pigment biosynthetic process

pigment metabolic process involved in pigmentation

establishment of protein localization to vacuole

secondary metabolite biosynthetic process

ommochrome biosynthetic process

syncytium formation

endosome organization
