

## proteasomal protein catabolic process

protein dephosphorylation carbohydrate derivative catabolic process

proteasome-mediated ubiquitin-dependent protein catabolic process

SCF-dependent proteasomal ubiquitin-dependent protein catabolic process regulation of protein dephosphorylation

regulation of dephosphorylation

organophosphate metabolic process

positive regulation of response to external stimulus

response to wounding regulation of response to wounding

positive regulation of response to wounding

mitochondrial respiratory chain complex assembly

phagocytosis

cell-cell adhesion via plasma-membrane adhesion molecules sodium-independent organic anion transport

calcium-dependent cell-cell adhesion via plasma membrane cell adhesion molecules homophilic cell adhesion via plasma membrane adhesion molecules

import into cell

transition metal ion transport

import across plasma membrane

metal ion transport

cellular zinc ion homeostasis

inorganic ion import across plasma membrane response to metal ion

inorganic cation import across plasma membrane

response to inorganic substance

detoxification

toxin catabolic process

oxidation-reduction process
