

cyclase activity

phosphorus-oxygen lyase activity

cytokine receptor binding

acetylglucosaminyltransferase activity

growth factor activity

acetylgalactosaminyltransferase activity

protein kinase regulator activity

oxidoreductase activity

phosphatase binding

p.adjust

0.1

0.3

0.4

size

molecular function regulator

SNAP receptor activity

enzyme inhibitor activity

dioxygenase activity

enzyme regulator activity

kinase regulator activity

transferase activity, transferring phosphorus-containing groups

protein kinase activity

protein phosphatase binding

phosphotransferase activity, alcohol group as acceptor

transmembrane receptor protein tyrosine kinase activity

ribonucleotide binding

carbohydrate derivative binding

purine nucleotide binding

protein tyrosine phosphatase activity

purine ribonucleoside triphosphate binding

transferase activity

kinase activity

protein tyrosine kinase activity

drug binding
