ATP hydrolysis coupled transmembrane transport

synaptic vesicle transport

calcium ion-regulated exocytosis of neurotransmitter

ATP hydrolysis coupled ion transmembrane transport

vesicle-mediated transport in synapse

establishment of synaptic vesicle localization

ATP hydrolysis coupled proton transport

synaptic vesicle localization

energy coupled proton transmembrane transport, against electrochemical gradient

regulation of calcium ion-dependent exocytosis

regulation of regulated secretory pathway

establishment of organelle localization

regulation of exocytosis

spindle localization

epidermal growth factor receptor signaling pathway

dendrite development

cytoplasmic microtubule organization

establishment of spindle localization

dendrite morphogenesis

ERBB signaling pathway

ribonucleoside biosynthetic process

regulation of dendrite development

regulation of dendrite morphogenesis

anatomical structure maturation

nucleoside biosynthetic process
