

entrainment of circadian clock by photoperiod

photoperiodism

negative regulation of RNA metabolic process

negative regulation of cellular macromolecule biosynthetic precess_thermotaxis

negative regulation of nucleic acid-templated transcription

negative regulation of nucleobase-containing compound metabolic process

negative regulation of transcription, DNA-templated

negative regulation of RNA biosynthetic process negative regulation of macromolecule biosynthetic process

negative regulation of cellular metabolic process

regulation of transcription by RNA polymerase II regulation of nitrogen compound metabolic process

regulation of primary metabolic process

cellular component morphogenesis

developmental growth involved in morphogenesis

anatomical structure morphogenesis

macromolecule modification

embryo development ending in birth or egg hatching

regulation of photoreceptor cell differentiation
embryonic development via the syncytial blastoderm

cell morphogenesis

organonitrogen compound catabolic process
hegative regulation of neuron differentiation

cellular response to topologically incorrect protein

glycosphingolipid metabolic process ecdysteroid metabolic process carbohydrate derivative catabolic process

ecdysteroid biosynthetic processorganic hydroxy compound transport
