

transcription factor activity, transcription factor binding

transcription factor activity, protein binding

carboxylic acid transmembrane transporter activity

nucleobase-containing compound transmembrane transporter activity

anion transmembrane transporter activity

L-amino acid transmembrane transporter activity transcription regulator activity

organic acid transmembrane transporter activity serine hydrolase activity
monocarboxylic acid transmembrane transporter activity

organic anion transmembrane transporter activity

serine—type peptidase activity

serine—type endopeptidase activity

serine—type endopeptidase activity

serine—type endopeptidase activity

glutathione transferase activity

kinase regulator activity

protein serine/threonine kinase activity

Rab GTPase binding

enzyme activator activity

phosphotransferase activity, alcohol group as acceptor

growth factor receptor binding protein kinase regulator activity

tubulin binding

syntaxin binding

protein kinase activity microtubule binding

structural constituent of cytoskeleton
