membrane lipid biosynthetic process

adenylate cyclase-modulating G-protein coupled receptor signaling pathway cAMP-mediated signaling

adenylate cyclase-activating G-protein coupled receptor signaling pathway

positive regulation of secretion by cell

cyclic-nucleotide-mediated signaling

cell-cell signaling regulation of synaptic vesicle cycle

regulation of lipid localization

presynapse organization positive regulation of transport

regulation of transport

positive regulation of secretion

regulation of cellular localization

lipid localization

regulation of localization

regulation of neurotransmitter secretion

lipid transport

regulation of neurotransmitter transport

organic hydroxy compound transport
