

## DNA-templated transcription, initiation

transcription initiation from RNA polymerase II promoter

cellular macromolecule biosynthetic process

eggshell chorion assembly

dorsal appendage formation

chorion-containing eggshell formation leg disc morphogenesis

macromolecule biosynthetic process cellular amide metabolic process cellular component assembly involved in morphogenesis

leg disc development

lipoprotein biosynthetic process lipoprotein metabolic process

eggshell formation imaginal disc-derived wing margin morphogenesis

epithelial cell development

organonitrogen compound biosynthetic process

imaginal disc-derived leg morphogenesis

protein lipidation

GPI anchor biosynthetic process

embryo development

carbohydrate derivative biosynthetic process

GPI anchor metabolic process

epithelial cell morphogenesis

protein N-linked glycosylation
