

chitinase activity

protein-containing complex binding hydrolase activity, acting on carbon-nitrogen (but not peptide) bonds

phospholipase activity

neurexin family protein binding ribonuclease activity

carboxylic ester hydrolase activity

amidine-lyase activity

endoribonuclease activity

lipase activity

voltage-gated cation channel activity

drug transmembrane transporter activity

hydrolase activity, acting on ester bonds

size

20

60

p.adjust

0.9977586

carbon-nitrogen lyase activity

voltage-gated ion channel activity vitamin B6 binding

pyridoxal phosphate binding

voltage-gated channel activity

mmonium transmembrane transporter activity

protein kinase activator activity

vitamin binding

serine-type endopeptidase inhibitor activity

enzyme regulator activity

kinase activator activity

kinase regulator activity

peptidase regulator activity

unfolded protein binding protein kinase regulator activity

glucuronosyltransferase activity
