

## synaptic target recognition

postsynaptic membrane organization

postsynapse organization

## cellular localization

membrane organization

regulation of vesicle-mediated transport macromolecule localization

cellular macromolecule localization

cellular protein localization

ommochrome biosynthetic process vesicle organization

membrane fusion

maintenance of protein location protein localization maintenance of location

secondary metabolite biosynthetic process protein localization to organelle

vesicle fusion

organelle fusion

ocellus pigment metabolic process regulation of organelle organization

organelle membrane fusion

ommochrome metabolic process

ocellus pigment biosynthetic process

microtubule cytoskeleton organization involved in mitosis

ocellus pigmentation

nuclear chromosome segregation mitotic spindle organization

chromosome segregation
