

lipoprotein biosynthetic process

protein lipidation

positive regulation of immune response

establishment of cell polarity

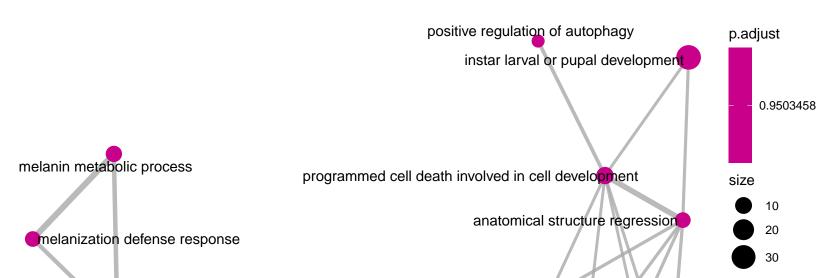

negative regulation of protein complex assembly

regulation of immune system process

lipoprotein metabolic process

positive regulation of innate immune response

egulation of protein localization

sterol metabolic process

organic hydroxy compound metabolic process

gland morphogenesis
salivary gland development

exocrine system development salivary gland morphogenesis

steroid biosynthetic process

steroid metabolic process

positive regulation of catalytic activity

ecdysteroid metabolic process

positive regulation of molecular function

cellular ketone metabolic process

ketone biosynthetic process

positive regulation of hydrolase activity

cellular hormone metabolic process
