

## excitatory postsynaptic potential

Notch signaling pathway

drug catabolic process

positive regulation of protein catabolic process carbohydrate derivative catabolic process

purine-containing compound catabolic process positive regulation of protein metabolic process

positive regulation of macromolecule metabolic process

secretion peptidyl-amino acid modification p.adjust protein transport 0.9927772 negative regulation of protein secretion oligosaccharide metabolic process protein glycosylation negative regulation of establishment of protein localization peptidyl-threonine modification size negative regulation of insulin secretion 10 20 negative regulation of protein transport glycosylation macromolecule glycosylation negative regulation of peptide secretion regulation of calcium ion transmembrane transporter activity

regulation of calcium-mediated signaling

sterol homeostasis phenol-containing compound biosynthetic process

regulation of lactation

organic hydroxy compound biosynthetic process

actin filament bundle organization cholesterol homeostasis

actin filament bundle assembly
