

## carboxylic acid transport organic acid transport

mitochondrial transport

drug transmembrane transport anion transmembrane transport

carboxylic acid transmembrane transport

fertilization

single fertilization

organic acid transmembrane transport

mitochondrial transmembrane transport

eggshell formation

aspartate family amino acid metabolic process

cellular component assembly involved in morphogenesis

chorion-containing eggshell formation

eggshell chorion assembly

cellular amino acid metabolic process

cellular response to acid chemical

oocyte differentiation

oogenesis

2.5

oocyte development

calcium-mediated signaling

transmission of nerve impulse

respiratory electron transport chain

ATP synthesis coupled electron transport

heterophilic cell-cell adhesion via plasma membrane cell adhesion molecules multicellular organismal signaling

cell adhesion mediated by integrin

cellular respiration

oxidative phosphorylation electron transport chain
