

regulation of microtubule depolymerization

positive regulation of cellular process

positive regulation of response to external stimulus

positive regulation of cell communication

positive regulation of defense response to bacterium

p.adjust

regulation of epidermal growth factor receptor signaling pathway regulation of ERBB signaling pathway

epidermal growth factor receptor signaling pathway

eye pigment metabolic process ERBB signaling pathway

eye pigment biosynthetic process

pigment metabolic process involved inpossitiventetjoration of gene expression

ocellus pigment biosynthetic process
ocellus pigment metabolic process

pigment metabolic process involved in developmental pigmentation

Notch receptor processing developmental pigmentation

establishment of protein localization to vacuole

eye pigmanodary metabolite biosynthetic poopposind eye pigmentation

ommochrome metabolic process—ocellus pigmentation

ommochrome biosynthetic process

ncRNA processing

RNA processing tRNA processing
