

lipoprotein biosynthetic process

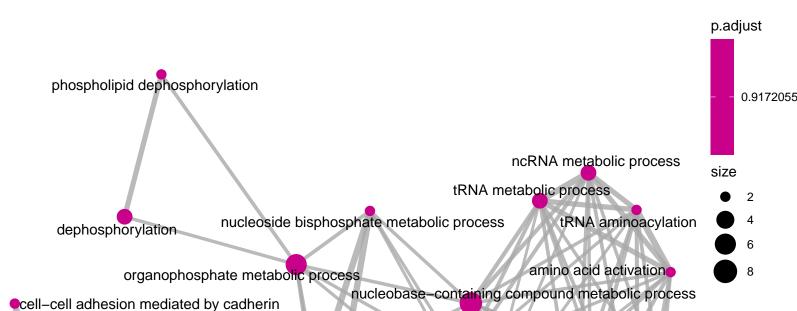

protein palmitoylation

establishment of protein localization to membrane

protein lipidation

protein acylation

lipoprotein metabolic process

heterocycle metabolic process

ribonucleoside bisphosphate metabolic process

small molecule metabolic process

•negative regulation of apoptotic process

cellular amino acid metabolic process

purine nucleoside bisphosphate metabolic process

calcium-dependent cell-cell adhesion via plasma membrane cell adhesion molecules cellular nitrogen compound catabolic process

neurotransmitter metabolic process

cellular amino acid biosynthetic process

heterocycle catabolic process
