

## cellular protein-containing complex assembly protein-containing complex subunit organization

extracellular matrix organization

positive regulation of transport

regulation of organelle organization regulation of transport

extracellular structure organization

secretion by cell

establishment of organelle localization

establishment of mitochondrion localization, microtubule-mediated

organelle localization

mitochondrion localization

establishment of mitochondrion localization

organelle transport along microtubule

mitochondrion transport along microtubule

response to decreased oxygen levels

mitochondrion organization

response to hypoxia

response to oxygen levels

p.adjust

size

0.40

10 20

neuron recognition

anatomical structure formation involved in morphogenesis

germarium-derived egg chamber formation

ell-cell signaling

immune response nucleobase-containing small molecule catabolic process

immune system process

L-amino acid transport

innate immune response purine nucleoside catabolic process

nucleoside catabolic process
