

neuropeptide signaling pathway

melanin metabolic process

purine nucleoside biosynthetic process

phenol-containing compound metabolic process

neuron maturation

purine nucleoside metabolic process

anatomical structure maturation

purine ribonucleoside metabolic process

transmembrane receptor protein tyrosine kinase signaling pathway

neuron remodeling

purine ribonucleoside biosynthetic process

regulation of cell maturation

egative regulation of multicellular organismal process

tRNA processing

mechanosensory behavior

RNA metabolic process

regulation of secondary metabolic process

negative regulation of growth

terpenoid metabolic process

regulation of actin polymerization or depolymerization negative regulation of biosynthetic process

feeding behavior

hormone biosynthetic process

regulation of lipid biosynthetic process

regulation of actin filament polymerization

regulation of actin filament length

negative regulation of cellular biosynthetic process

actin polymerization or depolymerization

multivesicular body sorting pathway

endosome transport via multivesicular body sorting pathway
